PITTSVILLE, MARYLAND

TINGLE'S BIG FIVE STRAWBERRY GARDEN

500 — 100 Kellogg's Premier, 100 New York, 100 Big Joe, 100 Dr. Burrill, 100 Progressive (Everbearing) — $5.00

Special price only $5.00 Order yours today

GREETINGS *for* 1922

THANK you again for your splendid patronage. Last year was another good year with me. My old customers were with me again and with them came about as many more new ones. I received nearly twice as many orders last spring as I ever received a season before. I expect both my old and new customers to stay with me and I believe you will appreciate the service I am trying to give and the high quality of the stock I furnish.

I have never grown better stock than I have this year. You old customers know what this means and to you who have never received any stock from me I would like to have at least a part of your order so that you may see the kind of stock I furnish and I believe you will then be a regular customer of mine.

You will notice that I do not have a great long list of varieties. I have tried to select only the very best sorts in fruits, ornamentals and flowers—the kind you will not go wrong on in planting.

Wishing you all the very best of success in your efforts to accomplish the most possible in the way of more and better fruits and in making the home more beautiful, I am

Very truly yours,
LEAMON G. TINGLE.

Instructions to Purchasers

Some nurserymen and seedsmen refuse to fill orders for less than one dollar; saying a smaller order is a loss to them. This is true, but I will be glad to receive your order, even though it means a loss to me in filling it, as I believe you will be so well pleased with what I send you that when you need any more of the stock I sell you will send your order to me. So, do not hesitate in sending me your order even though it may be a small one. We will try just as hard to please you as if it was a large one.

TERMS. Payment invariably, cash in advance. Remit by Money Order, Registered Letter or Draft.

HOW TO ORDER. Send me your order as soon as convenient, then I will reserve the stock for you and ship when wanted. Be sure to write your name and address plainly, and state how goods are to be shipped; whether by Parcel Post, Express or Freight, and state plainly to what point you want them sent.

TRANSPORTATION RULES. The ownership of all goods sold by me passes to the purchaser on delivery by me to the carrier, and the issuing of a receipt by the carrier ends my responsibility. Any claims for damage should be made promptly to the agent at the point of delivery. Under no conditions may I be held responsible for safe delivery.

SHIPPING SEASON. I begin filling orders about October 15th, sometimes a little earlier and continue digging and shipping during the entire fall, winter and spring until May 1st. We are sometimes delayed in January and February and early part of March by freezing weather, but usually able to ship at times during these months.

TRUE TO NAME. I use every care to have plants true to name and I will not be responsible for any sum greater than the original cost of stock should any prove not true to name.

CLAIMS, if any, must be made on receipt of goods, and if just, will be made satisfactory. I send out only good stock in good condition, carefully packed in all cases, but success or failure depends in so large a degree upon the care and management after received that I do not, because I cannot, undertake to guarantee stock to live.

SUESTITUTION. Late in the season I usually run short of some varieties listed herein; therefore, when you order late, please state on order sheet if you do not want me to substitute should I be sold out of the variety you order. If I substitute will give you a variety as near like the variety you ordered as possible.

INSPECTION. A Certificate of Inspection from our State Entomologist and State Pathologist will be attached to each and every shipment of stock.

Special Prices. I quote very attractive prices on large orders. Send me your want list for quotations.

Telegraph or Telephone me at Pittsville, Md.

PREMIER—The best early berry of them all

STRAWBERRIES

AROMA. One of the best late varieties. Plants are large, very vigorous and healthy; fruit large to very large, roundish, of a bright glossy red, of excellent quality and one of the most productive late varieties. Can always be depended on to bear a good crop of fine berries.

BEDERWOOD. A good berry for home use and nearby market, and one of the most productive on my list.

BIG JOE. This is one of the best berries on the list. Above medium in size, almost perfect in shape, very solid, bright red in color, and a good heavy bearer for so large a berry. The fruit is borne on long stiff stems, well up from the ground. Plants are very large and deep-rooted. Strong grower. A bed of Big Joe in fruit is about as handsome a sight as one often sees and it is a money-maker for both nearby and distant markets. Don't fail to plant Big Joe.

BRANDYWINE. Produces an abundance of large, handsome berries; good color and shape; peculiar and very fine flavor.

BUBACH. Large size and handsome color are its most valuable characteristics. Color is a beautiful bright red, neither dark nor light. Foliage dark and waxy. Berries thick, meaty, fine grained, often weighing more than an ounce each.

CAMPBELL'S EARLY. This is a new extra-early variety of great promise. In New Jersey where it originated the growers are very enthusiastic over it. One leading grower says: "Campbell's Early comes in ahead of them all, growing from such large, healthy plants with a light green, waxy, upright foliage protecting the great crop of large, beautiful, rich red berries. They have a beautiful green calyx and come second to none in flavor." One of the most wonderful features of the Campbell's Early is that practically all grow to full size and no knotty, ill-shaped berries; they ripen perfectly all over with no green ends. They are fine, vigorous growers, have perfect blossoms, and will retain their firmness in carrying to distant markets.

TESTIMONIAL

Kimesville, N. C., November 10, 1921.

Dear Sir:—We are sending you our check for $50.00. Please place to our credit. Will send balance due you in a few days. Your plants were O. K.

S. L. SPOON & SON.

DR. BURRILL

CHESAPEAKE. The standard of excellence, by which most other fancy berries are compared. With fair growing conditions, just about enough plants are produced for a good fruiting bed, is very strong and healthy. The plants are very strong and robust and have very long roots, which make it one of the best drought resisters. Berries are uniformly large, with prominent yellow seeds and an attractive bright green cap, altogether, making Chesapeake one of the most beautiful and attractive berries in the package that I have ever seen. The berries are unexcelled in quality. The plants set a good crop and every blossom matures a berry, the last ones being just as large as the first. The flesh is very firm in texture and the berries will keep for many days in excellent condition, so that altogether it is an ideal berry for home use, for local market, or for distant shipment. One of the most valuable features of the Chesapeake, especially in the North, is that the blossoms don't start out until quite late, which makes it practically frost-proof.

CORSICAN. A favorite home and nearby market variety in many sections. It is one of the very largest, holding its size well through the season, beautiful dark crimson color, rich and delicious. Plant a strong grower with good healthy foliage, producing large crops.

DR. BURRILL. A variety that is growing very popular, resembling Senator Dunlap in appearance. The berries are large and beautifully formed. The surface of the berry is a deep glossy red, the meat is solid and rich. As a canner it surpasses Warfield. The berries are excellent shippers and good keepers. An ideal berry for either home use or for the market.

EARLY OZARK. Among the very first to ripen and brings the grower good money on that account. Beautiful and productive.

GANDY. One of the universal favorities, and as a "money-maker" hard to beat. A good grower with tall healthy foliage, and produces large, dark crimson berries, that when fully ripe, are of excellent quality. It is a splendid berry and always brings fancy prices. A free plant maker and a good grower, while its extra firmness makes it keep on the vines longer than almost any I know. Late. If you grow late strawberries you need Gandy.

TESTIMONIAL

Clinton, Ind., April 8, 1921.

Dear Sir:—The strawberries ordered from you were received in good condition. Planted them out as soon as received and now are showing new leaves. I want to thank you for the extra plants you sent.

MRS. C. H. VAUGHN.

Kellog's Prize

Magic Gem

GLEN MARY. Probably no variety of strawberries will produce more quarts per acre than Glen Mary. It is very popular throughout the northern half of the United States and especially in Pennsylvania, New York and New England. Firm enough for distant shipping. It is of handsome appearance and good quality. The fruit is of large size and dark red in color with prominent seeds of bright yellow. The meat is so rich and juicy and of such high flavor that, when once eaten, more is wanted. Glen Mary is a strong grower which makes large, healthy plants, with an abundance of dark green foliage. Not only is Glen Mary a heavy cropper, but the berries are of such quality and attractiveness that they bring top prices on the market.

HAVERLAND. Exceedingly productive. Fruit large and fine. One of the most popular of the well-tested varieties. It will stand more frost than most any other variety, often bearing large crops when others are killed. We can always depend on a large crop. Few varieties will produce more fruit per acre or sell for more money. The demand for plants is always great.

HOWARD No. 17. A new variety resembling Premier very much from Connecticut. Described by a reliable Connecticut grower as follows: "The earliest fancy variety that I have ever seen. The first fruit to ripen is fully as large as Chesapeake, fully as firm and the quality fully as good. It is of the same coneshape and the color much the same, possibly not quite so dark but glossy and handsome. Will yield three times as much fruit as Chesapeake and is on the job a week before Chesapeake begins to ripen. So great is my faith in this variety that more than one-half of all I set the coming spring will be Howard No. 17. This variety has come in competition with hundreds of competitors on the grounds of the Connecticut Agricultural College and vanquished them all, not only for one or two years, mind you, but for ten years."

KELLOGG'S PRIZE. A variety with a very long fruiting season. It thrives in soils of every class, and yields immense quantities of large, perfectly formed berries, highly colored from center to circumference, its golden seeds lending a gloss to the surface of surpassing brilliancy and beauty. There is no other berry having a flavor of greater delicacy. Foliage large and healthy calyx large and green. One of the heaviest fruiters I have ever grown, and I recommend them to you for trial.

KELLOGG'S BIG LATE. A late berry that is rapidly forcing its way to the front. A heavy cropper and a good shipper.

KLONDYKE. One of the most heavily planted early berries in the country today; found in nearly all the large growers' fields. I believe this is sufficient recommendation for any berry.

TESTIMONIAL

Sedalia, Mo., April 2, 1921.

Dear Sir:—That shipment of plants received in good condition and you will not be forgotten in the future when needing more plants. Don't forget me on your permanent mailing list. Yours for more business.

C. B. GREEN.

LUPTON—A Real Money-Maker

PREMIER. This is undoubtedly the best early berry of them all and the Premier is a money-maker for the market grower. Growers who have tried all the leading sorts for the past twenty or more years claim they have never fruited a berry that will come anywhere near making the money that Premier does. It does not seem to have any weak points. The plants are strong, vigorous growers, very productive of beautiful glossy, rich red berries with a bright green cap, which adds much to their beauty. The berries are delicious in quality, and it is one of the best shipping berries. Whether you want a berry for your home table, local market or for long distance shipping you cannot afford to overlook Premier. It begins ripening with the early sorts and lasts until most of the mid-season sorts are through. There is an awful demand among the growers in the big shipping sections for Premier as it was by far the best money-maker of them all last season. Reports come in from all sections of the country saying it can't be beat.

LUPTON. One of the largest and most handsome berries that I have ever seen. On the large markets it always brings the top notch price on account of its large size, handsome appearance and well keeping qualities. The plant is a vigorous grower and produces strong, healthy plants with clean foliage. Very productive, and the berries are uniformly large, bright red in color, with a large green cap which adds much to their appearance. It is a money-maker for the above reasons but do not set it for your home table alone as it is of very poor eating quality, but for distant markets it is hard to beat as a mid-season to late variety.

MAGIC GEM. A mid-season to late variety originated by Edward Vance of Idaho. Because of the unusually large size and high quality of the berries and its long fruiting season, Mr. Vance has controlled the strawberry trade in his local market. The berries are not only large and abundant but they also are beautifully formed and are distinctly cone-shaped. The berries are highly colored, being dark red with a glossy surface, and bright yellow seeds which are imbedded in the surface just deep enough to produce a beautiful contrast. The flavor of the fruit is mild and delicious. The calyx is a dark, rich green, which adds to the beauty of the berry. The berries are very firm and ship exceedingly well.

MARSHALL. Too well known to need any extended description. This is a berry that has been so popular in the New England market for years, where the grocers are always delighted to get it on account of its rich dark red color, that it is bound to attract and please customers. It is one of the richest flavored strawberries grown. It is a strictly fancy berry. Mid-season.

MISSIONARY. A variety that is proving very popular all through the South. It is a strong grower, making plants freely; early to mature, coming in right after Excelsior, and very productive. The berries are well colored, firm, large, and hold their size well throughout the season. It is a good shipper, having a tough skin not easily broken by handling.

MITCHELL'S EARLY. An old favorite and still a favorite with many.

TESTIMONIAL

Weehawken, N. J., March 28, 1921.

Dear Sir:—I beg to acknowledge receipt of the plants which were found to be all O. K.

CHAS. RIEDERER, Weehawken Trust Co.

NEW YORK—The ideal home-table berry

McKINLEY. Unrivalled as a strawberry of high quality. Berries large, handsome and freely produced on strong growing, healthy plants. Ripens in mid-season and is too tender in texture to endure shipment. It is pre-eminently a variety for the home garden.

NEW YORK. This is the strawberry that was awarded a prize of $100 which was awarded for the best and largest variety. The plant is an unusually robust grower, making but few runners, throwing its strength and vigor into the magnificent berries, which are produced in great abundance and are of immense size. In form they are very handsome and regular, of a medium conical shape. Color a crimson-scarlet, dark, rich and inviting, coloring all over and leaving no green tips. The flavor is deliciously rich and melting. For a fancy strawberry it is one of the best, but its large size and delicate texture would possibly prevent the berries from arriving in good condition in distant markets. This berry is so popular it has been introduced under many different names.

PARSONS' BEAUTY. One that may be depended upon to produce a large crop of fruit every season. The plants are splendid growers on any soil and without a sign of disease. The fruit is large, conical, uniform shape, dark red and fair quality. Largely planted by commercial growers on account of its vigor and productiveness.

RYCKMAN. Said by some to be the best mid-season to late table and nearby market berries.

SENATOR DUNLAP. The Dunlap is a variety that beginners who know practically nothing about strawberries can succeed with. The foliage is tall, upright with a long leaf, and has more than the ordinary power of developing a heavy crown system. It has an extra long flowering season; the bloom is handsome and exceedingly rich in pollen which makes it very valuable to plant with such pistillate kinds as ripen in its season. Its long roots go down into the sub-soil for moisture, and a severe drought has less effect on it than most others. The fruit is a dark red, with a glossy finish, shading to a dark scarlet on the under side, with prominent yellow seeds that look like gold embedded in highly colored wax. The meat is bright red all through and exceedingly juicy. For a medium size, very productive, mid-season berry, don't hesitate to plant Dunlap.

SAMPLE. Large size, excellent quality; bright red, very firm, rich. A standard shipping variety; also fine for home use.

SHARPLESS. An old and well known berry, especially desirable in home gardens. Fruit large and of excellent quality.

SUCCESS. One of the finest early berries for the home garden; large, sweet and delicious.

TESTIMONIAL

Halls, Tenn., May 3, 1921.

Dear Sir:—I wired you yesterday to ship me 5,000 more Premier plants. Allow me to say my other plants were received in fine condition and I got a good stand.

FRED R. HUNT,
Peoples Savings Bank & Trust Co.

SENATOR DUNLAP

THE "BEST." I have never fruited this variety but a large grower in New York State sent me some of the plants last spring and he has the following to say about them: "This variety is by far the best strawberry that has ever fruited on our grounds. This is saying a good deal, for we have been growing strawberries for nearly 39 years. It is no experiment with us as we have tried it under all conditions, on all kinds of soils and under different treatment for at least ten years. The plants are model growers, very vigorous and stalky. None more productive. The berries ripen very late, almost the latest of all, coming just at the time when the last strawberries bring the best prices. The berries are very large, glossy and attractive, have fine flavor and when once sold to a customer they bring a demand for more of the berries. The fruit is very solid, firm and a good shipper." He goes on to praise it much more but I believe the above is sufficient recommendation for us to at least give it a trial. While I only have a small plot of these this season they grew so well that I have a sufficient number of plants to offer it for trial and I recommend that you get a few of the plants and try them out yourself.

TENNESSEE PROLIFIC. Berries medium size and light in color. Flesh fine grained and of good quality. Fairly good shipper. Very productive. Good pollenizer.

WARFIELD. Very popular for canning on account of its rich flesh and high color. It is a vigorous grower and persistent plant maker. If not allowed to get too thick it will produce a great crop of medium-sized, highly flavored and highly colored berries. Blossoms imperfect.

WM. BELT. A king among strawberries. The plant is vigorous and succeeds upon a great variety of soils, and invariably yields very heavily. It begins to ripen quite early and continues almost to the close of the season. It is firm and a good shipper and gives large pickings for a longer period than most varieties.

MIXED PLANTS. In digging plants we sometimes get up too many of certain varieties and have them left over. Occasionally a plot in the field becomes mixed. My mixed plants are made up either from plants left over or from a mixed plot. They will be good plants and when possible we will tell you the name of the varieties.

TESTIMONIAL

Abington, Mass., April 9, 1921.

Dear Sir:—I want to let you know that the strawberry plants you sent me came in first class shape, nice and fresh and well packed. I wish to thank you for your promptness and also for the extra plants you sent me. I gave your plants to a neighbor and he also sent you an order. I am herewith sending you another order.

L. J. TRAYNOR.

TOP NOTCH—Big, Sweet and Productive

EVERBEARING STRAWBERRIES

Bears from June till Thanksgiving.

These everbearing strawberries are pre-eminently the home-garden berry, although the fruit may be shipped short distances if properly packed. The method of raising these berries is the same as for the other sorts, excepting that for the first season, (that is the same season they are planted) all blossoms that come before the middle of July should be kept cut off. They not only produce a good crop of berries the first year planted, but the following year they fruit at the same time as the old standard sorts and then produce another crop in the fall.

PROGRESSIVE. This is generally considered the best of them all. Produces immense crops of medium size berries of the very highest flavor, even better than most of the "June only" varieties. If you have never grown strawberries of any sort you will be safe in planting these.

SUPERB. In some sections, especially the North, this is considered better than Progressive but for the South and Middle States I believe Progressive the best. The berries of Superb are larger than the Progressive but it does not produce half as many of them, nor is it usually as good a plant maker. The berries resemble those of the Chesapeake.

AMERICUS. The berries are medium to large in size, firm and of the very highest flavor, very spicy, the flavor is entirely different from any other strawberry that I have ever tasted.

IDEAL. One of the newest of the everbearers. Has a little smaller plant than the Superb and the berry is a little smaller but it is much more productive.

PEERLESS. Better than Superb, being a more vigorous grower, more productive of equally as large fruit and fully equal to Superb in quality. If you have been growing Superb try a few Peerless.

TOP NOTCH. A strong, luxuriant grower, not affected by any disease. One of the most productive of the everbearers, as large as the Superb and much more productive with me. If you want something extra fancy try Top Notch.

MINNESOTA No. 1017. The plants are good sturdy growers, produce a goodly number of runners, besides stooling heavily. The fruit that each individual plant produces is almost incredible. They simply lay about the plants in piles. The fruit is good size, round in shape, deep red in color and very firm and of good quality. I believe it will be one of the best market sorts.

TESTIMONIAL

New Albany, Ind., March 7, 1921.

Dear Sir:—I received the plants in fine shape. They were certainly well packed and am much satisfied with them. The folks who have seen them say they are nice. And they are. Will send you another order next year.

CASPER VERICK.

PARCEL POST CHARGES.

If you want stock shipped by Parcel Post would advise you to have it sent C. O. D. for amount of postage. By doing this you pay your postmaster or carrier the actual amount of postage when you receive the goods. This is much more satisfactory to both of us.

TINGLE'S FRAGRANT PEONIES

The National Flower for Memorial Day

Peonies are too well known to require much description. They are perfectly hardy, will thrive in almost any location, and when once planted will increase in size and beauty each year.

Fall is undoubtedly the best time to plant peonies and I most urgently advise you to plant them then. You may lose more by planting them in the spring than you could possibly gain. I advise you to send me your order now and let me reserve the plants and send to you at the proper planting time this fall. But, if you want them this spring, I can furnish them.

50 cents each; $4.50 for 10; $40.00 per 100.

COURONNE D'ORR. This is the famous "Crown of Gold." A variety famous for its beauty. Snowy white, reflecting the golden stamens and lighting up the flower, the center petals beautifully flecked and bordered carmine; immense semi-rose type flowers; late; growth upright, vigorous, with very strong stems; blooms freely; the cut flowers keep well.

DUCHESS DE NEMOURS. One of the best regardless of price. Superb ivory white with greenish markings near the center, becoming pure white without crimson markings; one of the most beautiful both in the half open bud and when full blown; fragrant; crown type; early to mid-season; strong, vigorous growth with good stem; blooms very freely in clusters. Fine for the lawn and for cut flowers.

FESTIVA MAXIMA. For enormous size combined with wondrous beauty this variety has stood unsurpassed for 65 years. Pure paper white flaked with purplish carmine on some of the center petals; rose type; early; very fragrant; very vigorous, with very long, heavy stems; indispensable. You can't plant too many Festiva Maxima.

FLORAL TREASURE. Color bright pink, very large and double; exquisitely fragrant; a splendid bloomer and excellent keeper.

L'ECLETANTE. Bomb type; mid-season; flowers are very double and full; color deep brilliant velvety-crimson. It makes a handsome plant, every flower standing up straight and erect well above the foliage. I think this one of the finest peonies.

LOUIS VAN HOUTTE. Rich crimson maroon, developing a silvery tip when flower matures; very attractive. Exceedingly choice.

MADAM CALOT. Rose type; early; large convex bloom; hydrangea-pink, center shaded slightly darker with a somewhat sulphur tint in the collar. This peony has three distinctive qualities over all other varieties. First, it blooms any and every year, never failing; second, it produces more flowers than any peony ever introduced; third, it is the most fragrant of all peonies, the perfume being delicious. In the above three points Madam Calot stands pre-eminent. Simply a wonder.

MADAME DE VERNEVILLE. An enormous producer of extra fine flowers; large, compact, and literally packed with petals; very broad white guards, center slightly blush, becoming pure white, noticeably flecked with carmine; delightful fragrance; bomb type; the earliest white of the Albiflora type; extra strong, vigorous growth of medium height with good stems; one of the finest both for cut flowers and landscape planting.

MADAME DUCEL. A very large, very double, perfectly formed globular bloom, the center petals as beautifully incurved as in a chrysanthemum; bright silvery pink; fragrant; bomb type; mid-season to late; vigorous; blooms freely; excellent.

MEISSONIER. Medium size, bomb, developing a crown with age; uniform brilliant purple-red; fragrant; very tall, free bloomer; very brilliant coloring; mid-season.

MIXED. These are some of the fine named varieties that have become mixed in handling. 25c each; $20.00 per 100.

TESTIMONIAL

Warrensburgh, N. Y., April 12, 1921.

Dear Sir:—I received the plants in fine shape. With your perfect system of packing they would stand a long journey and come through safe. Enclosed find another order which send soon as possible.

S. E. PROSSER.

ERSKINE PARK Raspberry—Don't fail to try It

RASPBERRIES

Coming immediately after strawberries, when there is a dearth of other fresh fruit, raspberries are much sought after for planting in the garden and also in the field for market. They are easily cultivated and beds seldom require renewing. Their season of ripening is long and fruit always in demand. Plant in good soil and manure freely from time to time. Plant four feet apart each way. Cut out the old shoots each spring.

10 cents each; $1.25 for 25; $3.50 per 100; $25 per 1000.

ERSKINE PARK. (Everbearing). Of this grand berry I cannot say too much in praise, and I predict that once known, it will be a standard for planting in every garden and considered a necessity. The St. Regis has been the standard everbearing variety up to the present time. In the Erskine Park we have a berry that far surpasses it; a raspberry that is a delight to eat, each berry being of the largest size, with its delicious melting flesh, full of rich creamy juice, highly flavored and sweet as honey. Conceive the joy and satisfaction of having such berries on your table all through the autumn, the source of wonder to your neighbors, that you can pick the finest raspberries till the snow flies. Owing to my being able to secure a large stock of plants of this variety I am offering them at the price of the other common varieties. Do not fail to include some of these in your order.

ST. REGIS. (Everbearing). Ripens with the earliest and continues on young canes until autumn. Color red, flesh firm and meaty. Largely planted.

HERBERT. A very strong grower, hardy and very productive. Fruit large to very large, obtusely conical, bright to rather deep red; drupes medium size, not crumbling; moderately firm; sweet and sub-acid, sprightly juicy and of good flavor. Quality very good. Season begins a few days before Cuthbert. It has all the good points required in a berry for local market, being hardy, vigorous, productive with fruit of large size, good color and very good quality.

KANSAS. A valuable early black cap, so strong and hardy as to endure extremes of cold and drought and yet bear heavy crops.

CUMBERLAND. A healthy, vigorous grower, throwing up stout, stocky well branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality about the same as Gregg, keeps and ships as well as any of the blacks. The most profitable market variety. Mid-season.

GREGG. This has been the leading market variety all over the country. Best for evaporating. A good, strong, all around black cap of good quality.

PLUM FARMER. A vigorous, stocky growing black cap, very healthy and attractive in appearance; productive, bearing heavy crops of large, fine jet black berries; excellent quality and a good shipper. One of the most valuable market berries, as it commands top prices.

BLOWERS BLACKBERRY—Productive and Hardy

BLACKBERRIES

Blackberries are among the best known and most valued of our berries. No fruit of any kind is more wholesome. A liberal use of berries and other good fruit will save doctors' bills. Blackberries should be planted in rows six or seven feet apart, three or four feet in the row. Keep the ground light, rich and clean, and pinch the canes back when they have reached four feet in height. The demand for blackberries is always good.

10 cents each; $1.25 for 25; $3.50 per 100; $25 per 1000.

EARLY HARVEST. One of the earliest, berry medium sized, good quality and very prolific; firm and attractive in appearance. A good market sort.

ELDORADO. Vine is vigorous and hardy; berries are very large, black, borne in clusters; ripens well together; sweet, melting and pleasing to the taste.

MESEREAU. Large, oval, sparkling black, sweet, rich and melting, hardy and productive.

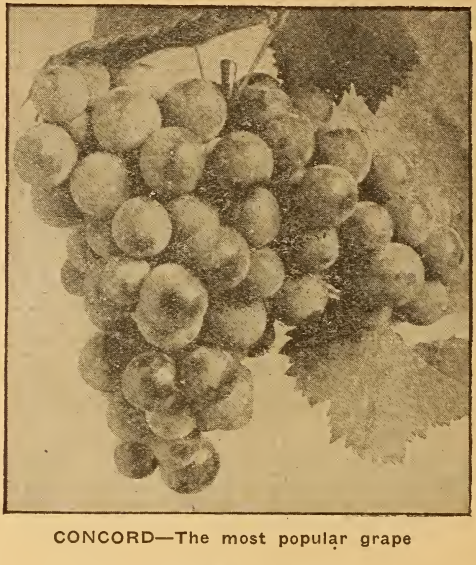
BLOWERS. In this we have a large productive and hardy blackberry. Blowers is a sturdy grower (the canes, if unchecked, attain a height of ten to twelve feet on fertile soil). It yields very heavily and for a long season. The fruit is handsome as well as large, and is of superb quality. Its canes have endured a temperature of twenty degrees below zero unharmed, and it has yielded at the rate of 280 bushels per acre.

LAWTON. The well-known market variety. Large, oval, black, juicy, sweet.

DEWBERRIES

50 cents for 10; $1.00 for 25; $3.00 for 100; $25 per 1000.

LUCRETIA. Extremely productive of berries as large as the largest blackberries, ripens 2 weeks before blackberries. Dewberries are same as blackberries, except vines of dewberries run on the ground while blackberry canes grow up.



CONCORD—The most popular grape

GRAPE VINES

No home should be without grapes. They are planted anywhere and everywhere, to trail on fences, sides of houses, etc. Grapes when planted in such manner grow without any care. Even people who live in crowded towns and cities can grow grapes. They are also a paying crop to grow for market.

25 cents each; $2.00 for 10; $15.00 for 100; $125 for 1000.

CATAWBA (Red). Well known. Bunch and berry large and of a rich, vinous, refreshing flavor and best quality. Ripens several weeks after Concord.

CONCORD (Black). The most extensively planted and generally successful grape in America. Bunch and berry large, fair quality, medium early; vine a rank grower, very healthy, hardy and productive.

DELAWARE (Red). The standard of excellence. Bunch and berry medium, compact, flesh juicy, very sweet and refreshing. Ripens with or before Concord. Vines very hardy and productive; a slow grower, requires rich soil, good culture and close pruning. Subject to mildew in poor grape sections and seasons.

MOORE'S EARLY. About two weeks earlier than Concord; large, black, with a heavy bloom; desirable for home and market for its size, season, hardiness and productiveness.

NIAGARA (White). A magnificent grape and very valuable for both garden and vineyard. Berries large with tough skin; quality very good; beautiful bunches of the largest size. Ripens about with Concord. A rank grower and very productive. Popular with vineyardists and amateurs. North and South.

SALEM (Dark red). Bunch and berry large; flesh sweet, tender, with a rich, fine flavor. Ripens with Concord. Good

GOOSEBERRIES

Gooseberries are easily grown, readily respond to care and are reliable annual bearers. There is almost always a demand for them at profitable prices. They do not require much space.

30 cents each; $2.50 for 10; $20 per 100.

DOWNING. One of the old reliable varieties. Fruit is quite large, pale green in color, and of splendid quality. Bushes are vigorous growers.

HOUGHTON. This variety rarely fails to produce a crop every year, and usually the bushes are loaded to the limit. The berries are of medium size, and the plants are extremely hardy and healthy.

The above illustration shows Asparagus and Strawberries growing in a back-yard garden. Notice the hedge of California Privet growing between the house and the garden. There is much pleasure and profit in having even a small garden in which to grow your own fruits and vegetables so as to have them fresh just when you want them.

ASPARAGUS

This is the earliest and finest of the spring vegetables. It is very profitable to grow, both for home use and market, as a bed once established will remain in good condition for thirty years or more. Have ground in good condition, and place plants 8 inches apart in the row with rows 3 feet apart. Plant deep enough so that the crowns are covered with from two to three inches of mellow earth. Enrich and give dressing of 3 lbs. salt to sq. yd. each spring.

75 cents for 25; $2.00 for 100; $10.00 per 1000.

GIANT ARGENTEUIL. A splendid early French variety of large size and green in color; excellent flavor.

PALMETTO. Large, dark green variety of vigorous growth, having pointed tips.

CONOVER'S COLOSSAL. Large and rapid grower of excellent quality; green in color.

CURRANTS

25 cents each; $2.00 for 10; $15.00 per 100.

CHERRY (Red). Fruit of a very large size and very tart; plant vigorous, but not as productive as some of the other varieties.

FAY'S PROLIFIC (Red). A cross between Cherry and Victoria. Of large size, fine flavor, and claimed to be twice as prolific as the Cherry. Highly recommended by those who have seen or had experience with it.

WILDER. A remarkable new variety both for table and market; strong grower, enormously productive; bunch and berry very large; bright red and of highest sub-acid quality, making it unequalled for the table, cooking or market.

LOGAN BERRY

25 cents each; $3.00 for 25; $15.00 per 100.

This is not a Raspberry nor a Blackberry, but possesses properties of both of these fruits. The berries are large and long, somewhat like certain varieties of the blackberry, but are deep crimson in color, rich, sprightly and refreshing, but unlike any other fruit in flavor; firm in texture and attractive in appearance. The bush in habit is somewhat like a blackberry, but more spreading, with large leaves that resemble a purple cane raspberry.

STAYMAN WINESAP

APPLE TREES

The price of apples is always high and it seems impossible for growers to supply the demand. It is the healthiest of all the fruits. Its seasons of ripening extends throughout the entire summer and fall months; it is also possible to have them the year around.

	Each	10	100
1 Yr. 3-5 ft.	$0.35	$3.00	$25.00
2 Yr. 4-6 ft.	.50	4.50	40.00

BALDWIN. Large, roundish, skin deep red; flesh juicy, crisp sub-acid, good flavor; very vigorous and productive. The best all-around winter apple for New England and Northern States. Splendid keeper. December to March.

DELICIOUS. Winter apple. Keeps well, color red and yellow, fine grained, and quite juicy, flavor slightly acid, but very good. A good apple for either home use or market.

DUTCHESS. Very hardy grower, fruit medium size, red striped, the bright red is shaded with crimson. A very good early apple.

GRIMES GOLDEN. Very large, skin golden yellow; flesh tender and crisp. A very good fall apple. September to January. Grown in all sections of the country.

JONATHAN. Most beautiful of all apples. Season November to April. Fruit medium to large, roundish, yellow nearly covered with red, fine grained, tender and finely flavored.

McINTOSH. Medium size, nearly covered with a bright red flesh yellowish, tender, juicy, sub-acid. October to February.

PARAGON (Mammoth Black Twig). Winter. A round apple, of extra-large size; skin smooth, yellowish, covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid aromatic, of excellent quality in every way. Tree is vigorous and healthy and yields big crops every year.

ROME BEAUTY. A very fine market variety for the northern and western states. Fruit very large, skin yellow, mottled with bright red; in highly colored specimens almost solid red on exposed cheek, striped with bright carmine. Flesh crisp, juicy, agreeable, mild, sub-acid. Ripens in November, last to April or May.

STAYMEN'S WINESAP. November to April, but keeps well in May. A profitable sort to grow for market, and the best for home use. Large in size, fine appearance, good flavor, juicy and crisp, color red. A great success.

WINESAP. Medium to large size. Red color; flesh yellow; firm crisp, with rich flavor quality very good. November to May.

WINTER BANANA. Size large, golden yellow and beautifully shaped with bright crimson red. Flesh lemon yellow, fine grained, sub-acid, rich aromatic flavor. Season November to January.

YELLOW TRANSPARENT. Fruit medium to large, with a brilliant waxy skin; flesh is tender, crisp and juicy, color yellow. Summer apple growing offers a large profit to the fruit grower, and the Yellow Transparent is the Variety to plant.

YORK IMPERIAL. A very good one, trees come into bearing early, and bears a good crop each year. Skin bright yellow covered with bright red and striped, very large. Suitable to any part of the country.

ELBERTA—The old, reliable money-maker

PEACH TREES

While my list of Peaches is not large it is the pick of the whole list, the kinds you will not go wrong on. We all want peaches and it only takes a few trees to supply a large family the entire peach season.

	Each	10	100
2 to 3 ft.	$0.30	$2.50	$20.00
3 to 4 ft.	.35	3.00	25.00
4 to 5 ft.	.40	3.50	30.00
5 to 6 ft.	.50	4.00	35.00

BELLE OF GEORGIA. Ripens here the first to fifteenth of August. Fruit is large, white with red cheek; flesh white, firm, of excellent flavor. Tree a rapid grower and very productive. One of the very best market sorts. Freestone.

CARMEN. A very hardy peach, ripening here about the middle of July; skin pale yellow, with blush on sunny side; flesh white, tender, sweet and melting. Ships well. The best early market peach.

CHAIR'S CHOICE. Begins to ripen about the first of September. Large in size; flesh firm, of the sweetest and richest grape flavor; color yellow. Freestone.

CHAMPION. An exceedingly good, early peach. Skin cream white with red cheeks; a perfect freestone, which is a rarething among early peaches; very hardy; regular bearer.

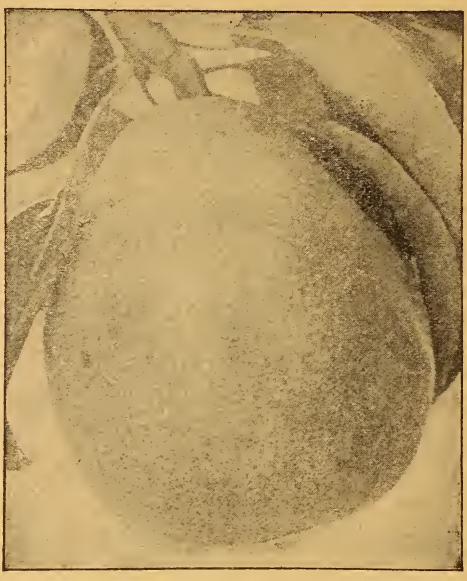
CRAWFORD'S EARLY. Freestone. Large, oblong, yellow with deep red cheek; flesh yellow, juicy and rich, excellent flavor.

CRAWFORD'S LATE. Ripens with Chair's Choice. Freestone. High quality and very large size; flesh deep yellow; skin yellow with a broad dark red cheek.

ELBERTA. Mid-season. A valuable large peach, of good quality; fruit large, yellow with red cheek; juicy and extremely high flavored; flesh yellow; freestone. The leading market variety. Ripens here about the middle of August

GREENSBORO. Ripens here from June 25th to July 10th. Large in size; white in color with a red cheek. Flesh rich and melting; very juicy; tree a strong grower.

WHITE HEATH CLING. Ripens from September 10th to 15th. This is an old variety of cling peach and has never been excelled by any other of its class. Fruit extra large and roundish; flesh white and exceedingly juicy. It is a favorite with all housewives for canning purposes.



KIEFFER—One of the most profitable

PEAR TREES

5 to 6 ft., $1.25 each; $11.00 for 10; $100 per 100.

KIEFFER. One of the most prolific pears. It is an abundant and regular bearer. Good shipper. Fruit large, color yellow with red cheek. Will produce ten bushels of pears to the tree when ten years old, begins fruiting successfully when three years old. Season October.

SECKEL. Medium size, skin rich, yellowish brown with deep brownish red cheek when fully ripe; flesh very fine grained, sweet, exceedingly juicy, melting, buttery. One of the richest and highest flavored pears known. Summer.

BARTLETT. Season last of August to September 15th. Good strong grower, flesh is white, fine grained, luscious, large and buttery, has a rich, melting flavor and very sweet.

PLUM TREES

5 to 6 ft., $1.25 each; $11.00 for 10; $100 per 100.

ABUNDANCE. Fruit very large and showy; flesh light yellow, exceedingly juicy, tender and sweet. A good market variety. July.

BRADSHAW. Large size, flesh yellowish green, juicy and sweet; skin dark violet red. Ripens middle of August.

BURBANK. Fruit very large; dark violet red; flesh juicy and pleasant. Ripens middle of August. Productive.

GERMAN PRUNE. Dark purple or blue, juicy, rich, of best quality. September.

SHROPSHIRE DAMSON. Medium size fruit, produced in b[illegible]ick cluster or groups. Tree a strong grower, and very pro[illegible]ductive of dark purple colored plums. October.

ag[illegible]
or [illegible]

QUINCE TREES

S
in [illegible] **to 5 ft., $1.25 each; $11.00 for 10; $100 per 100.**

ho[illegible]HAMPION. Tree strong grower; produces a good crop every an[illegible]ar. Fruit is large and of good quality. Cooks as tender as an [illegible]pple. October.

Did you ever notice that a good, healthy orchard always adds several hundred dollars or thousands to the value of a farm in the eyes of a prospective purchaser?

IMPORTANT

When trees are received and you are not ready to plant, bed them out until you are ready. When doing this dig a trench deep enough to admit all roots, and cover with mellow earth, extending well up the bodies of the trees.

MONTMORENCY—Hardy and Productive

CHERRY TREES

5 to 6 ft., $1.25 each; $11.00 for 10; $100 per 100.

Sweet Cherries

BALDWIN. Ripens in early June. Large, dark red; splendid variety.

BLACK TARTARIAN. Black, very large, rich and sweet. Productive. Ripens last of June.

GOVERNOR WOOD. Yellow with red cheek; tender, rich, delicious, very fine, large, roundish, depresses at stem; productive, early.

Sour Cherries

EARLY RICHMOND. Medium to large. Dark red, juicy, good flavor. June.

MONTMORENCY. Medium to large. Dark red, juicy, good flavor. Late.

MORE FRUIT TREES SHOULD BE PLANTED

The planting of fruit in all its branches has not kept pace with the increase in population, and in consequence we are now confronted with an extreme shortage. All you need do is to refer to the prices that have been obtained the past summer for fruit of all kinds and you will see that the man that took care of his trees has reaped the reward that he is entitled to.

It is not necessary to stop growing farm crops because you are planting a new orchard; you can grow almost any kind of crops among your young planted trees for at least three years, and it will be much better for your trees if they receive such extra cultivation. The only crops I do not advocate for young orchards are Wheat, Oats and Timothy.

NUT TREES

BUTTERNUT. A fine native tree producing a large, longish nut, which is prized for its sweet, oily nutritious kernel.
7 to 8 feet, $1.50 each.

CHESTNUT, AMERICAN SWEET is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes.
2 to 3 feet, $1.25 each.

PECAN. The tree grows fast and bears well, producing large crops of thin-shelled nuts that are full kerneled and delicately flavored. 4 to 5 feet, $1.50 each.

JAPAN WALNUT. Very hardy, makes quick growth, bears abundantly when young, produces large nuts of best quality
5 to 6 feet, $1.50 each.

WALNUT, BLACK. The common well-known Black Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are liked by many.
2 to 3 feet, $1.00 each.

WALNUT, ENGLISH. A fine, lofty growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. Every home garden should have one or more English Walnuts. Tree very hardy, will succeed well in all states east of the Mississippi
4 to 5 feet, $2.50 each.

SILVER MAPLE

SHADE AND ORNAMENTAL TREES

The appropriate use of trees and shrubs in the adornment of city, village, suburban or country home grounds gives a charm and beauty which is interesting and pleasing to passersby as well as to the occupants of the house. In arranging home grounds the aim should be to hide, by means of trees and shrubbery, all objectionable buildings or portions of the place, and also to shut from view all unsightly objects maintained by neighbors.

AMERICAN ELM. A fine wide spreading tree, of very dark green leaves, very extensively planted and considered by many the best shade tree in the world. Entirely hardy and succeeds in any location. 8 to 10 ft., $1.00 each; $9.00 per 10.

CATALPA BUNGEII. A pleasing lawn tree of formal appearance, no lawn is complete without this tree. Dwarf habit of growing. 2 year heads, $2.00 each; $17.50 per 10.

CATALPA SPECIOSA. Very fast grower, makes a shade within 2 to 3 years. Leaves are very large, many measuring 5 inches across, extensively planted where a quick shade is desired. Valuable for timber, fence posts, railroad ties, etc. Flowers, white in summer.
8 to 10 feet, $1.00 each; $8.00 per 10.

LOMBARDY POPLAR. Makes fast growth, does not spread, a tall spire-like tree, altogether planted at the entrance of driveways, and to mark boundary lines. Unsurpassed for its purpose. 7 to 8 feet, $1.00 each; $7.50 per 10.

NORWAY MAPLE. A large, handsome tree of spreading, rounded form, with broad, deep, green foliage. Very hardy, and extensively planted.
8 to 10 feet, $1.75 each; $16.00 per 10.

ORIENTAL PLANE. Has a very wide round topped head, thick branches, rapid grower. A good one for either street or lawn planting.
7 to 8 feet, $1.00 each; $8.00 per 10.

PURPLE RIVERS BEECH. A blood-leaved tree, attractive for lawn planting, retains its foliage through the winter.
4 to 5 feet, $2.50 each; $22.50 per 10.

SILVER MAPLE. Produces a quick shade. The leaves on top are light green, underneath the leaves same shade as bright silver, and as the summer breeze approaches them, the silver and green flashes are very attractive. Extensively planted.
8 to 10 feet, $1.00 each; $8.00 per 10.

Foundation Planting of Evergreens

EVERGREENS

AMERICAN ARBORVITAE. Rather dwarf habit of growing. Its foliage or leaves are flat instead of needle like, and sets on edge, color bright green. One of the most extensively planted of all evergreens. Used as specimens for the lawn, and in tubs for porches, also extensively planted for hedges and screens, to break the force of winter winds. Fast grower for first 4 years, after this dwarf habit of growing.

3 to 4 feet, $2.50 each; $22.50 per 10.

DOUGLAS SPRUCE. A choice evergreen, foliage is dark green to silvery blue, and grows downward. Tips of branches bear 3-inch cones. Very compact conical habit of growing.

3 to 4 feet, $2.50 each; $22.50 per 10.

COLORADO BLUE SPRUCE. Foliage blue and sage—that distinctive color which is so rare in the East. Tree usually has a symmetrically shaped narrow-pointed or rounding top; is hardy and quick growing.

2 to 2½ feet, $3.50 each.

COLORADO GREEN SPRUCE. It is extremely hardy and endures well the sun and drying winds. Very compact and symmetrical. Color a beautiful green which it retains throughout the entire year.

2 to 2½ feet, $2.50 each.

IRISH JUNIPER. Junipers are handsome evergreens. Always neat and clean. This variety grows exceptionally slim and column-like. The branches grow almost straight, up, and a 7 or 8 foot tree will not be more than a foot and a half thick.

2½ to 3 feet, $2.50 each.

RED CEDAR. A tall-growing native tree of great beauty and hardiness, varying somewhat in habit of growth from regular and conical to loose and irregular, but retaining its handsome appearance withal. Usually densely branched and thickly clothed with deep rich green foliage.

1 to 2 feet, $1.00 each. 2 to 3 feet, $2.00 each.

AMERICAN HOLLY. The hardy native variety that is especially familiar to us because of its extensive use at Christmas time. Usually forms a slow-growing tree with short, spreading branches; leaves large, shining green, with thorny edges; bright red berries in winter. Of easy culture, thriving on practically all soils. Stands the winter climate of bleak New England without injury. 2 to 3 feet, $2.50 each.

A BEAUTIFUL, PERMANENT GARDEN AT LOW COST

You can have a beautiful garden of flowers at surprisingly low cost and comparatively little care.

The greatest beauty and fragrance does not necessarily come from the rare and high-priced varieties. Many costly flowers are not half as beautiful and lasting as those listed here, nor do they stand frost and cold as well.

A little money judiciously invested in shrubs, roses, and perennials now, will repay you many times over in future pleasure, and will likewise add to the value of your property.

HYDRANGEA P. G.—One of the best shrubs

DECORATIVE SHRUBS AND PLANTS

Many times you have seen a cozy little home nestling among its vines, flowers, and trees, with an open stretch of lawn. By itself that home would be just a plain little house. Good taste and thoughtful attention rather than money has wrought the change.

ALTHEA (Rose of Sharon). Stately shrubs of upright habit, attaining a height of 10 to 15 feet; valuable as single specimens and as screens and hedges, particularly where soil and arid climate do not permit the use of many other shrubs. The blooms, which resemble the hollyhock in form but more refined and not so large, appear in abundance in late summer when few other shrubs are in bloom, and make a good cut flower. The foliage is a fine dark green. The newer varieties are much improved in size and color. 50c each.

BUDDLEIA (Butterfly Bush). A most beautiful shrub and one that should be in every garden. A splendid shrub for park planting. It makes large shrubs even from small plants the first season. Single plants will often have 50 or more flower spikes the first year. The second year after planting it generally begins to bloom in June and continues throughout the summer until frost nips it. The flowers are produced on long, graceful stems that terminate in tapering panicles of beautiful lilac-colored flowers of miniature size and borne by the hundred. 50c each.

CLETHRA (Sweet Pepper Bush). A pretty little shrub that blossoms freely for several weeks in summer; very fragrant white flowers, in slender racemes; an excellent honey plant for bees. 50c each.

CORNUS (Red Dogwood). Flowers greenish white, in flat cymes, followed by white fruit; bark deep red and very attractive in winter. When planted with other shrubs, the effect in winter is very striking. As a single lawn shrub it is well adapted, owing to its low branching habit and ornamental broad foliage. 50c each.

DEUTZIA PRIDE OF ROCHESTER. In early spring the bush is fairly covered with dainty double tassel-like flowers in racemes 4 to 6 inches long, white with the outer petals tinted rose, in a setting of deep green foliage. A vigorous, tall, upright shrub of easy culture, thriving in any well drained soil. Under the most adverse conditions it will give a fair show of bloom, but place it in a position where it has room to develop and you will be amply rewarded with a profusion of flowers. 50c each.

GOLDEN BELL (Forsythia). One of the first flowers to let us know spring is here. Few if any of the spring flowering shrubs surpass the splendor and brilliancy of the Golden Bell; they are easily grown in almost any kind of garden soil, and have handsome clean foliage, which is remarkably free from insects and remains unchanged until late in the fall. 50c each.

HYDRANGEA. This beautiful shrub is being sent out under various names, as "Snowball Hydrangea," "Hills of Snow," etc. This new American Hydrangea is believed to be the most beautiful, hardy flowering shrub introduced for many years.

The plant attains a height of five or six feet, with about the same breadth, is far more graceful than the old form of Hydrangea Arborescens. Flowers are borne in large trusses, beautifully formed and of dazzling whiteness, rendering it a plant of peerless beauty. Seems to do best in rather damp or shady location.

The flowers, when cut, remain in good condition a long time, thus making the plant especially useful for cut flowers. 60c each.

H. PANICULATA GRANDIFLORA (Bush Shape). This is one of the most valuable hardy shrubs in cultivation. It attains a height of six to eight feet, and is perfectly hardy in all parts of the country. The flowers are white, borne in immense pyramidal panicles nearly a foot in length. It commences flowering in July and continues until November. This is the finest flowering shrub for cemetery planting we know of. 60c each.

HONEYSUCKLE (Bush). Handsome in flower, showy in fruit, and ornamental in its bluish-green foliage, has everything to commend it. As a specimen shrub it assumes the proportions of a small tree, and will form an oval, symmetrical bush, covered in early June with its beautiful pink and white flowers, which give way later to pretty reddish berries. This fruit literally covers the shrub, making one wonder whether it is more attractive when in bloom or when bearing its berries. 50c each.

PHILADELPHUS (Syringa or Mock Orange). For grouping with other shrubs, forming large screens or hedges which may not require pruning, or used as single specimen lawn plants they are desirable. They will bear heavy pruning and quickly resume their free, semi-pendulous, picturesque effect. 50c each.

SNOWBERRY. Has small pink flowers in May, but the charming green foliage with the beautiful clusters of snow-white berries which hang until late in the winter has made it popular everywhere. Grows about 4 to 5 feet tall. Very hardy. 50c each.

SNOWBALL. An old-time favorite, large, round balls of little white flowers; just as popular today as ever. Grows six to nine feet tall. Blooms in May or June. Very hardy. 50c each.

JAPAN SNOWBALL. Pure white flowers in dense, globular clusters, 4 to 5 inches in diameter, which look like balls of snow. The plant grows 6 feet and over, and the blooms fairly cover the bush. The heavy ribbed foliage of deep, dark green is beautiful always, and in May it makes a splendid setting for the handsome balls of snow-white flowers. 50c each.

SPIREA. Few shrubs lend themselves to every situation or condition as well as Spireas, showy, free flowering shrubs of easiest culture and covering a considerable blooming period from spring into summer. They are valuable for garden, lawn and landscape planting, being graceful, compact and hardy, preferring sunny situations.

S. VAN HOUTTE. The grandest of all the Spireas. It is a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom, the foliage hardly showing. Clusters of twenty to thirty flat, white florets make up the racemes, and these clusters are set close along the drooping stems. Perfectly hardy and an early bloomer. 40c each.

SPIREA ANTHONY WATERER. Its dark crimson flowers, borne in large flat-topped heads, appear in great profusion all summer if cut off as they fade. Of dwarf habit, rarely exceeding 3 feet. The leaves at the tips of the new growth are often pink or light yellow. 50c each.

WEIGELA ROSEA. Rose-colored flowers, trumpet-shaped like the honeysuckle, coming in long, graceful sprays. The best flowering shrub of its season. Grows where others fail. Free from insects and diseases. Grows about 6 feet tall. 50c each.

CLEMATIS PANICULATA. Flowers rich, creamy white, borne in splendid clusters, completely covering the vine with beautiful, star-shaped blossoms; exceedingly fragrant, the sweetest of all clematis and one of the hardiest and easiest to grow. 50c each.

WISTERIA. Picturesque climber with great clusters of pale bluish violet, pea-shaped flowers that make a handsome showing when a vine has been properly trained over a porch or arbor. After becoming established, the vine makes an enormous annual growth. 50c each.

ROSES

Strong 2-yr. plants, 70 cents each.
Hybrid Perpetual or Summer Roses.

FRAU KARL DRUSCHKI. Snow Queen. Large and fragrant. It is marvelous in its beauty in half opened bud, and in the snow white of the full bloom. A good one. Summer and August bloomer.

HUGH DICKSON. Crimson. Very hardy, blooms full, flowers large and fragrant. Finest rose of its color. Summer and autumn bloomer.

MARGARET DICKSON. Large white flesh colored center, fragrant summer and autumn bloomer.

PAUL NEYRON. The largest of all roses; often measuring 5 inches across the bloom. PINK. A free bloomer and hardy grower.

Hybrid Teas or Everblooming Roses.

GRUS AN TEPLITZ. Everblooming scarlet crimson. A strong grower. The best everbloomer of its color.

LA FRANCE. Rich satiny peach, changing to deep rose. Large. The sweetest of all everblooming.

KILLARNEY. Fine satiny pink. Perfectly hardy, robust grower. A constant bloomer.

KAISERIN AUGUSTE VICTORIA. This is one of the most beautiful roses grown. Its extra-large, exquisitely formed flowers are borne singly on strong upright stems, making it very popular as a cut-flower. Buds are long and the flowers very full, deep, and sweet-scented. Color, pure white, slightly tinged lemon-yellow, giving a rich cream effect and very lovely.

Climbers and Ramblers.
Strong field grown plants, 35 cents each; $3.00 per 10.

AMERICAN PILLAR. If ever there was a rose constituted to stand the trying conditions of our American climate, we have it in this unique, hardy, free-blooming climber. It will thrive in poor soil as well as in rich, and insists on growing vigorously. It has stout, thick, curving branches, rather thorny, but furnished with an abundance of glossy dark green leaves. Each stem has 9 leaflets instead of the usual 7 or 5, a kind of double supply, which gives the bush a very rich effect. It is one of the first to start growth in the early spring, and here holds its leaves of lively green till far past Thanksgiving Day, and it is seldom troubled with insects. It begins blooming here early in June. Single flowers of rich, rosy pink approaching brilliant carmine, just a glint of white in the center, and long stamens of beautiful golden yellow. The blossoms—four to six layers deep—are arranged in large-flowered clusters all over the plant. A tremendous grower, with its thick vigorous canes, it is without doubt one of the most valuable single climbing roses in existence and is unsurpassed for planting singly or as a hedge. In the autumn it is again a brilliant show of color with its pretty clusters of bright red seed-hips which remain on the bush until well into winter.

DOROTHY PERKINS. Rambler. June and July this one produces immense trusses of delightful pink flowers. Hardiest of all roses, makes 20 to 30 feet runners in one season.

DOROTHY PERKINS WHITE. Same as Pink Dorothy, except flowers are snow white.

CRIMSON RAMBLER. Deep crimson flowers in immense trusses, very hardy and extensively planted.

EXCELSEA. Same as Dorothy Perkins except flowers are a brilliant red.

HIAWATHA. Bears large clusters of single flowers of intense deep crimson, with the petals shading to pure white at the base; bright, effective, and useful for planting in masses.

WICHURAIANA. The Hardy Single White Memorial Rose. Will grow in sun or shade, poor ground or rich. Single blossoms, pure satiny white with bright golden stamens in center. It is especially useful for growing on embankments, as it grows close to the ground, rooting where the branches touch, so that in time it forms a thick, impenetrable mat.

GOLDFINCH. Buds golden yellow, opening flowers changing to white, semi-double. Growth very vigorous, climbing.

MISCELLANEOUS BULBS, PLANTS, ETC.

DASHEENS. Belong to the same family as the Elephant Ear, and resemble them somewhat but grow more upright; leaf is rounder and of a much darker green in color. They like plenty of water but will thrive where it is too dry for the Elephant Ear. In the South, where they can have a warm, frostless season of six months, they are grown in large quantities and used as a substitute for the Irish potato. 15c each; 50c for 4; $1.25 per dozen.

CINNAMON VINE. The handsome foliage is dark green, thick and glossy and free from insects, while numbers of white blossoms emit a delightful cinnamon like odor. We know of no other vine that will more quickly and satisfactorily cover an arbor, trellis, wall or fence for shade or screen purposes. It will thrive anywhere, and when once established will grow for years. Grows 25 to 40 feet high. 15c each; 50c for 4; $1.25 per

TUBEROSE (Excelsior Dwarf Double Pearl). 24 to 30 inches high. Does not require any stakes to be tied to as the stems are more dwarf and stiffly erect with longer spikes. Flowers large, full double and extremely sweet. 10c each; 25c for 3; 75c per dozen.

YUCCA FILAMENTOSA (Adam's Needle). Handsome evergreen plant with sword-like leaves that in June or July sends up tall stalks bearing creamy white bell-like flowers. Very effective as corner-pieces for shrubby hedges. 25c each; $1.00 for 5.

GOLDEN GLOW. This is a beautiful yellow blooming perennial plant, and stands out of doors all winter. The foliage, which dies back every fall, springs up vigorously in the spring and grows to the height of 5 or 6 feet. 15c each; 50c for 4; $1.25 per dozen.

TINGLE'S MAGNIFICENT DAHLIAS

ACHIEVEMENT (Collarette). The largest and finest of the Collarettes. A clear, rich, velvety maroon; collar a beautiful waxy snow-white, very daintily overlaid pinkish crimson. 20c each.

BRUNHILDE (Cactus). A handsome violet purple; wide, loose, recurved and somewhat twisted petals. 15c each.

CHATENAY (Peony). The pink shades combining with the salmon makes this one of the most beautiful dahlias. Dwarf, free and fine stem. 20c each.

CLIFFORD W. BRUTON (Dec.). One of the best canary yellows of immense size, perfect form, vigorous grower and an extremely free bloomer. 15c each.

CUBAN GIANT (Show). Flowers 6 to 7 inches in diameter, dark glowing crimson shaded maroon. A tall, strong grower with projecting flower stems. 20c each.

DELICE (Dec.). One of the best pink dahlias in any class, very valuable for cutting on account of its firm substance, lasting qualities and good stems. The flowers are full and perfectly formed; a soft rose pink. 20c each.

DREER'S WHITE (Show). One of the best white show dahlias for cutting. 25c each.

ELLA KRAEMER (Cactus). One of the most satisfactory pink dahlias and a good cut flower sort. 20c each.

F. W. FELLOWS (Cactus). This variety produces large blooms with narrow florets, flower stems wiry, color bright orange scarlet; very free; splendid. 50c each.

GOLDEN EAGLE (Cactus). Large flowers with incurved petals; golden buff. 15c each.

GOLDEN GATE (Cactus). Great full flowers often 9 inches across, bears early and free; deep, rich golden yellow, shaded with fawn. 30c each.

JACK ROSE (Dec.). A magnificent sort, very free flowering and showy in the field, with long stems and perfect form for cutting. Color rich crimson-red, with maroon shadings at center. The most widely planted dahlia today. 15c each.

KING OF AUTUMN (Dec.). Large perfectly formed flowers, held erect on long stiff stems. The color is a beautiful shade of burnt amber, tinged and shaded old rose. Of all the dahlias I grew the past season this attracted by far the most attention of them all. $1.00 each.

LORD GOFF (Single). Delicate cream, heavily tipped rose-pink. 20c each.

MADONNA (Peony). Large white, with delicate blending of lavender-pink. Long stems; good cut flower variety. 20c each.

MINA BURGLE (Dec.). One of the finest varieties producing flowers of gigantic size and remarkable beauty. The flowers are a brilliant scarlet and borne upon long, wiry stems, well above the foliage. A variety which attracts universal attention. 25c each.

MRS. J. G. CASSATT (Dec.). Rose colored, with grand stems and plenty of substance in flowers. 15c each.

MRS. WARNAAR (Hybrid Cactus). A magnificent Holland variety. Flowers of immense size and great depth and substance. Stems very long and strong. Color the most beautiful creamy white with the faintest blush of peach pink. It is a masterpiece. $1.00 each.

MRS. WM. MARSHALL (Cactus). Soft pink, base of florets deeper in tint, large creamy white center. 20c each.

MME. HENRY CAVEUX (Cactus). Rich pink with a blending of white at center. 25c each.

NEWPORT WINNER (Single). Large crimson of good form and size. 25c each.

PERLE DE LYON (Dec.). A magnificent white cutting sort, of large full form and great freedom. The petals are very long, broad and imbricated, giving a pretty ruffled effect; pure glistening white. 25c each.

PRINCESS JULIANA (Peony Dec.). A dahlia of special merit; it is pure white, perfect flowers, dark green foliage; long, strong stems. (Cut flowers last for 3 or 4 days in water.) A robust grower, it is a variety that should be grown by every lover of the dahlia. 50c each.

QUEEN VICTORIA (Show). A fine pure canary yellow dahlia. Profuse bloomer; long stem. 15c each.

QUEEN WILHELMINA (Peony). Immense, fluffy flowers of pure white, with yellow center. 20c each.

RED HUSSAR (Show). Tall, bushy, upright; with wrinkled highly ornamental foliage. Flowers full, recurved to ball shape, fiery cardinal. A good one. 15c each.

SOUV. DE GUSTAVE DOAZAN (Dec.). Mammoth flowers with long, even petals 1 to 1¾ inches wide; center rounded up and much darker than balance; brilliant orange-red. A free bloomer and very showy. 25c each.

SYLVIA (Dec.). Deep pink, tinting to light pink at center; large perfectly formed flowers produced profusely on long, stiff stems. Indispensable where quantity of flowers are wanted. A strong vigorous grower and always blooms. 15c each.

TOM LUNDY (Hybrid Cactus). A huge crimson carmine beauty of full formation on erect stems. Very attractive and a dahlia you will be much pleased with. 75c each.

TUSTU (Cactus). One of the most beautiful to date. The color is perfectly gorgeous—a beautiful velvety maroon. The petals are very long, tightly quilled and arranged in exact regularity. 50c each.

VIVIAN (Show). White, effectively edged rose-violet; one of the largest and finest to date. 25c each.

WHITE SWAN (Show). A beautiful pure white dahlia. A good cut flower variety and a profuse bloomer. 15c each.

WM. AGNEW (Dec.). An old standard variety and still one of the most popular reds. Flowers large, on long slightly drooping stems; a vivid unshaded red. 15c each.

W. W. RAWSON (Show). In form similar to Dreer's White; flowers of good size, stems erect; color a glistening white delicately flushed and suffused lilac. 20c each.

YELLOW DUKE (Dec.). Giant flowers of clear canary yellow on long stems. 15c each.

GERMAN IRIS

Strong plants, 15 cents each; $1.25 for 10.

CELESTE. Pure celestial blue throughout, shading to porcelain; open flowers held high in the air; very profuse and one of the finest varieties; tall.

DARIUS. Stands lemon yellow; falls light yellow blotched and marked with rosy lilac.

DELICATE. Stands delicate straw tinted with rose; falls deep lilac shading to white.

FLORENTINA ALBA. Silver Queen. Stands and falls porcelain shading to pure white; flowers large; blooms early; very fragrant.

REBECCA. Honorablis, Sans Souci. Stands golden yellow; falls mahogany brown.

H. CRAMER. Stands deep celestial blue; falls pure Yale blue; tall habit; blooms early.

LA TENDRE. Bridesmaid, Edina. Stands porcelain slightly smoked; falls light blue heavily veined with violet.

PRES. THIERS. Stands mauve, much smoked and penciled brown at base; falls purple, base marked with brown and white. Flowers late.

QUEEN OF MAY. Rosy Gem. Stands bright rosy blue; falls a shade darker. Very showy and attractive.

VIRGIN. Stands French white, slightly shaded with yellow; falls deep purple with white.

LARGE FLOWERING CANNAS

For bedding purposes, cannas stand at the head of the list. No more satisfactory plant could be found; they succeed in all parts of the country, in any kind of soil, but will, of course, do better in rich soil, well prepared. In recent years, cannas have been greatly improved. The old "Indian Shot Plant" was grown principally for its massive foliage; the flowers were insignificant. The new types have flowers six to eight inches across, in great clusters of varied and rich colors, borne continuously all summer. I am offering a choice mixture of the different colors and types, just what you will want, and at a very low price.

10 cents each; 75 cents for 10; $5.00 per 100.

A field of Gladiolus just beginning to come into full bloom.

GLADIOLUS

SELECT GLADIOLUS. The gladiolus is one of the most popular and beautiful of the summer flowering bulbs with tall spikes of flowers, some 2 feet or more in height. Of almost every desirable color, blotched and spotted in the most curious manner. They have absolutely no insect enemies and no diseases, and best of all, they will grow and bloom in any soil. I have never known any one to fail with them. Try them and be convinced.

Price: 5c each; 50c per dozen; $3.50 per 100.

Not less than 6 of one kind at dozen rate nor less than 50 of one kind at 100 rate.

AMERICA. A beautiful soft shell-pink color, tinged lavender; growth and habit perfect. Too well known to need comment. Fine for cut flowers.

CHICAGO WHITE. Pure white, with lavender markings in the throat. Early blooming; fine for florists. Several flowers open at one time.

CRACKERJACK. Dark red, throat spotted with yellow and maroon.

HALLEY. Enormous, open flowers of a delicate flesh color, shading lighter to the center, with a cream yellow and carmine blotch. Very early.

MEADOWVALE. Pure white, touched with crimson in throat, lower petals marked with faint pink.

MRS. FRANCIS KING. Large flowers of a light scarlet color or better described as flame color, are about 4½ inches across. Spikes always have 5 to 6 flowers open at one time. For garden effect or cut flowers it is one of the best.

PRIMULINUS HYBRIDS, MIXED. This species of gladiolus has received much attention during recent years and has created a sensation wherever it was exhibited. The blooms are distinct and superior to the older types in their pleasing form and arrangement. Although the individual flowers are not large, they carry an air of grace altogether different from the more or less stiff effect of other gladioli. Furthermore, these hybrids produce three and sometimes four fully developed flower-spikes

EVERBLOOMING ROSES

SPECIAL BARGAIN SALE

SINCE printing my catalog I have been very fortunate in securing a large lot of the popular Everblooming or Monthly Roses. Big, husky two and three year olds. Sizes one to three feet. There are no better Roses grown than those included in this assortment.

COLUMBIA. A beautiful, true pink; deepening as it matures to a warm, glowing tone, which is enduring. A good summer Rose and its great size, color and long stems make it a good cutting variety.

HOOSIER BEAUTY. A large, full flower with well shaped buds; color glowing crimson. Sweetly scented, great favorite for cutting.

RUSSELL. One of the choicest new pink Roses, similar in character to the red American Beauty; a lovely shade of bright rose-pink.

OPHELIA. One of the most beautiful and popular of recent cut-flower favorites; with perfect flowers of distinct form, lavishly produced, emitting an exquisite perfume; white, shaded with salmon flesh and rose. There is a strong glow of yellow at base of petals, while the tight buds are almost as yellow as Mrs. Ward.

SUNBURST. Very select, with long spiral buds; a lovely bronzy yellow fading to apricot.

WHITE KILLARNEY. A duplicate of the charming pink Killarney, with flowers white as snow.

I have described the above half-dozen varieties to show you what is in this collection. There are several others equally as beautiful.

These are all fine cut flower and garden sorts and will bloom profusely this summer.

Rose Lovers Don't Miss This Opportunity

Ready for shipment in April, but to be sure of getting them send your order in at once and they will be shipped to you as soon as stock is received. Make your selection from the above list, or if you will leave the selection to me I will see that you get a nice selection of varieties and colors.

Send your order without delay

50c each, $5 per 12, by parcel post prepaid

This surely enables you to provide for a lovely display of Roses at a very low cost

STRAWBERRY CULTURE

Soil—Whether it is for market or for home use, the results obtained will in a general way depend on the condition of the soil as to fertility and drainage. Any soil that will produce a good crop of corn or potatoes, if sufficiently drained (either naturally or artificially), will produce a good crop of strawberries. A heavy, sandy loam or a light clay loam is preferable for a strawberry patch; however, good results can be obtained upon the lighter soils, if sufficient care is taken to retain moisture. As the strawberry crop is of more value than the ordinary farm crop, more care should be taken that the soil is in proper condition and supplied with the necessary amount of plant food. After your ground is prepared thoroughly, it would be best to have it rolled or floated, so as to have an even surface.

Planting—Spring is the proper time for planting in the northern states. (While a good many plants are set in the fall, and with a reasonable amount of success, still the time for growing is not sufficiently long to allow the plants to produce a crop of berries the first year, and the extra expense of cultivation and care does not pay for the outlay.) Set your plants just as early in the spring as possible, in April for the northern states and earlier, if possible, in southern. Avoid planting on a dry, windy day. When the plants are being set great care should be taken that the roots are not exposed. Keep the roots in a pail of water, if they are somewhat dry, and in planting see that the moist soil comes in contact with the roots. The distance to plant in the row depends somewhat on the variety and also upon the method of cultivation. For the matted row system set the plants about 15 inches apart in the row. For hill culture some set the plants two feet each way while others have their rows three feet apart and plants 12 to 15 inches in the row. Mark your rows three and one-half or four feet apart.

Cultivation—Cultivation should commence as soon after planting as possible and continue until fall once a week whenever it is in a suitable condition, and hoe as often as necessary to keep the weeds down. As soon as the blossom stock is large enough to permit of its being done, it should be pinched off. Do not neglect this, if you wish a strong, vigorous growth. Do not let the plants mat too thickly. If they throw out too many runners, some of them should be removed. The plants should be three or four inches apart in the row. This is very essential in producing large crops of berries. The rows should be about 14 inches wide, and when you have secured this, keep off all runners and you will have an ideal fruit row.

Mulching—As soon as the ground is frozen so as to hold up a team and wagon it is best to mulch. This is not absolutely necessary, but it is a great advantage where straw or anything that can be used for mulch can be had, as it protects them from being hurt by hard freezing. In the spring rake between the rows, and it will help to retain moisture and keep the berries clean.

My Strawberry Plants are all dug from new beds and rows are taken up solid, all those poorly rooted are thrown out, the dead leaves and stems are picked off, roots straightened and tied in bunches of 25 Thus the purchaser receives the strongest and best plants made during the season of growth. Those are worth much more than plants dug from the alleys.

Very Important. When strawberry plants are received, if your ground is not ready, or if the weather is dry and windy, do not plant out, but take them from the package, loosen the bunches and heel them to moist soil, firm the ground around the roots and, if dry, water and shade them from the sun, and they will commence to grow. When your ground is ready and the weather is favorable, plant out. Treated in this way scarcely a plant will fail to grow.

The matter of buying your plants may look like a small matter, but it is an important job because so much depends on the right kind of plants. No matter how valuable your land—no matter how much you weed, dig, hoe or cultivate—no matter how deep you plow—how well you make the seed bed, how much you disc and harrow or rake your garden—no matter how much the sun shines, or how much rain you get—or how much you irrigate or water your garden—no matter how ideal the weather conditions may be or how much you fertilize or manure the soil—and every one of these things represents real money—they are all lost—all wasted—all the effort counts for nothing if in the first place you don't have the right kind of plants to put in the soil.

LINNAEUS RHUBARB

12c each; $1.00 for 10; $2.25 for 25; $6.50 per 100.

When spring opens, the human system needs an acid. Fruits have not yet supplied these acids, therefore rhubarb, or pieplant, is the only source. Those who eat pieplant pie and sauce freely are greatly benefited. Do you realize what excellent sauce can be made of rhubarb? Set 15 to 18 inches apart, in the row.

TINGLE PRINTING CO., PITTSVILLE, MD.

CALIFORNIA PRIVET

THIS is the universal hedge in the East. For live fences it is the very best of materials. On public grounds of all kinds, in parks and cemeteries, along roads and paths, on factory grounds, and on newly subdivided areas near towns, nothing else can be used in its place, and in this place it is indespensible. California Privet has handsome, glossy, dark green foliage and the leaves last well into the winter. This valuable plant withstands any amount of pruning, can be pruned at any time, and the more you prune it the better it will look, and the better hedge it will form. Keep the hedge low when you simply want a border, and let it grow 5 to 6 feet high, or even higher, when you wish a screen. It can be trimmed to any form and trained into arches if desired. It is very adaptable. Best of all *no insects bother this sturdy plant.* It is quite hardy, grows fast and will give you a fine hedge in a short space of time.

	10	100	1,000
6 to 12 inches	$ .75	$4.00	$30.00
12 to 18 inches	1.00	5.00	40.00
18 to 24 inches	1.25	6.00	50.00
2 to 3 feet	1.50	7.00	60.00

BERBERIS THUNBERGII

(Japan Barberry)

THERE is no shrub in existence so generally planted or more practical for all purposes where beautiful foliage effect is desired. It is dwarf growing, uniformly bushy and rounded in form, susceptible to formal pruning, with small, numerous leaves densely covering the thorny twigs. These give it paramount importance for use as a filler and edging for shrubbery groups; as a foundation screen in front of porches; and, above all, as a compact, impassable, hardy, low hedge for confining lawns or dividing properties. As dainty in character as Maiden Hair fern, the foliage throughout spring and summer graduates from brightest to richest green; while autumn makes them blaze with crimson-scarlet and gold. Following the close-set, small flowers of creamy white, are oval fruits which gleam redly along every branch in late fall, and far into the winter.

12 to 18 in.—35 cts. each; $3.00 per 10; $25.00 per 100.

BOX BARBERRY

A VERY dwarf, compact form of Berberis Thunbergii of ironclad hardihood. Especially valuable for edging beds in formal gardening or for forming a low hedge anywhere. Its small pretty leaves are green, changing to brilliant shades of yellow and red in autumn. For edging, plant 4 inches apart; for a low hedge, plant 6 to 9 inches apart.

Two-year plants—25 cts. each; $2.25 per 10; $20.00 per 100.
